Summary

Full-Stack Developer specializing in React.js and Laravel, experienced in building responsive web applications, authentication systems, dashboards, and RESTful APIs. Passionate about developing clean, scalable, and user-centered solutions.

Work Experience

React.js Instructor

March 2026 – Present

Al-Rukn Training Center

Syria, Damascus Suburb, Yabroud

- Delivered hands-on React.js training covering hooks, state management, props, and component architecture.
- Guided students in building a customer management and accounting system.
- Mentored 6 students in successfully developing their graduation projects, including a full featured accounting web application built with React.js

Web Content Uploading intern

May 2025 – November 2025

GAO TEK Company

USA , New York

- Managed and published web content using WordPress.
- Optimized formatting of text, images, and videos for responsive display.
- Collaborated with marketing team to improve website layout and user experience.

Software Engineer

August 2024 – February 2025

KCPC Group at UOK

Syria, Damascus Suburb

- Taught algorithms and data structures to improve problem-solving skills.
- Designed and optimized MySQL database schemas.
- Reduced database query response time by 30% through SQL optimization.

Education

Bachelor Of Information Technology Programming, and Software Engineering

University Of Kalamoon

February 2020 – June 2025 | Syria, Damascus Suburb

Projects

- **Technology Cafe: Full-stack web Application (React.js, Laravel, MySQL)**
 - Developed a cafe management system with user management, order processing,
 - Implemented authentication and role-based access control.
 - Built responsive UI using React.JS and integrated RESTful APIs.
[Github](#)
- **Restaurant Automation System: (Node.JS)**
 - Built a system to automate restaurant operations and customer interactions.
 - Developed backend logic for handling orders and data storage.
 - Designed a scalable structure for managing restaurant workflows.
[Github](#)
- **Operating System Scheduling Simulator: (C#)**
 - Developed a simulator for process scheduling algorithms (FCFS, Round Robin).
 - Calculated execution times and compared algorithm performance.
 - Implemented logic to visualize scheduling behavior.
